

203.18 - Thermoelectric Materials

PLEASE NOTE: The tables are presented to facilitate comparisons among a family of materials to help customers select the best SRM for their needs. For specific values and uncertainties, the certificate is the only official source.

SRM	Description	Unit Size	Seebeck Coefficient Range
3451	Low Temperature Seebeck Coefficient Standard	bar	-20.83 $\mu\text{V/K}$ to -208.17 $\mu\text{V/K}$

- Certified values are normal font
- Reference values are italicized
- Values in parentheses are for information only
